

PG with Stabilizer and Mini-Seal

The SRU25 fully stainless steel pressure gauge is equipped with an inbuilt silicon jelly stabilizer movement for mechanical dampening against pressure spikes, vibrations, etc.

- stable and reliable reading by a specially designed movement part
- no oil leakage, no blurry display, no oil refilling
- no risk of contamination of process media

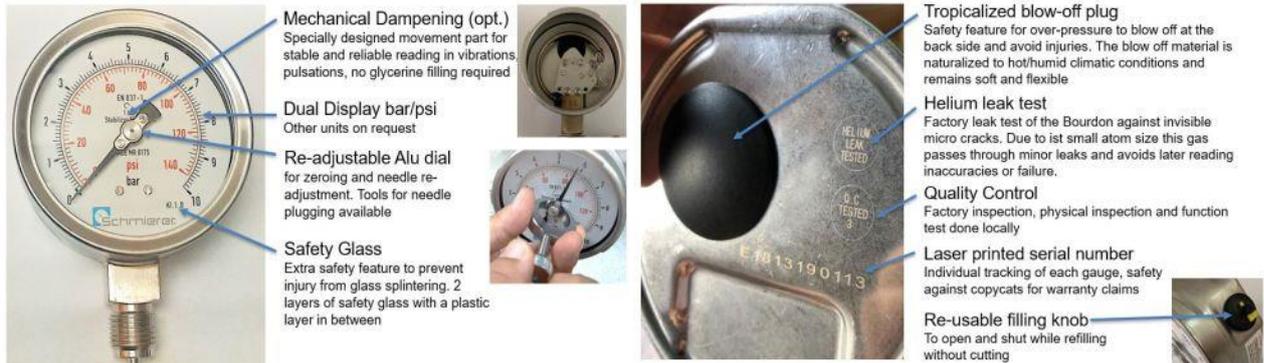

The SRU25X lightweight, stainless steel pressure gauge with heavy duty mini diaphragm seal is the ideal choice for

- corrosive, viscous, sedimentous process media
- with a high temperature or high pressure

The diaphragm is AISI 316L welded to the body to ensure separation of the filling fluid from the process medium.

Advantages:

Features:

Gauge:

Rugged fully stainless steel construction
 Seamless tube bourdon, socket SS316L, NACE, TIG welding, Helium leak tested
 Shatterproof 2 layer safety glass, dual display bar/psi
 Case, Bezel, Movement SS304, NBR nitrile rubber gasket, IP 66
 Pressure range from -1 to 15 bar, 0 – 100 bar (opt. up to 1600 bar)
 Temperature compensated Neopren Rubber Blow Out Disc
 Dual display bar/psi
 Zero re-adjustable pointer on white aluminium dial

Miniseal:

½" -1 bar to 400 bar, ¼" -1 bar to 200 bar
 up to 300°C process temperature
